D-Link®
Building Networks for People

2-Port USB 2.0 Cardbus Adapter

Features and Benefits

Two Hi-Speed USB 2.0 Ports

The DUB-C2 upgrades your existing notebook computer with two Hi-Speed USB 2.0 ports for enhanced performance for your Hi-Speed USB peripherals.

Hi-Speed 480Mbps Transfer Speeds

Hi-Speed USB 2.0 provides 480 Mbps transfer speeds for fast transfer of digital content. At 40 times faster than the speed of USB 1.1, USB 2.0 makes it easier then ever to transfer digital content to and from your computer and USB 2.0 peripheral products. The DUB-C2 enables faster print processing with USB 2.0 printers and faster page scanning using USB 2.0 scanners.

Backward Compatible with USB 1.1 Devices

The DUB-C2 is backward compatible with all of your existing USB 1.x products. This means that you don't have to replace the USB 1.x products you already have. Simply connect your USB 2.0 and USB 1.x products to the DUB-C2. Each device will perform at its fastest speed automatically.

Plug-&-Play

With Plug-&-Play installation, the DUB-C2 is easier to install then ever before. Simply plug the DUB-C2 into an available Cardbus slot on your computer and install the provided software.

Compatible with Microsoft® Windows XP, Me, 2000 and 98

The DUB-C2 ensures compatibility with your computer and interoperability with your existing USB products by providing drivers for the most common and popular operating systems.
